115Vac INPUT POWER SUPPLY

Providing two isolated output voltages and up to 20W continuous output power, the **AC20W-12V-PBF** is optimized for 115Vac/ 47-800Hz single phase RTCA/DO-160G airborne applications. The **AC20W-12V-PBF** is capable of providing up to 20W output during momentary input AC interrupt conditions for greater than 200mSec.

Weighing less than 6 ounces, the **AC20W-12V-PBF** is constructed on a multi-layer PWB occupying $\sim 15\text{in}^2$. Component height is less than 0.70" except for the area of the supply containing hold-up capacitors; in this area maximum height is less than 1.26". Interconnection is accomplished using two vertically mounted TE connectors. The **AC20W-12V-PBF** is designed and manufactured to stand-up to the harsh operating environments encountered in today's aircraft installations.
